

### Instructions

This is a template for a Phenology Wheel which will fit on to an A2 size page.

Print four of this pattern onto A4 paper. When printing make sure your printer is set to 'actual size' setting if you want the wheel to fit on the A2 sheet. Cut out shape outline, tape pages together to form a circle.

Place an A2 sheet of paper over template and trace. (You can tape them to a window for tracing if you have trouble seeing through the lines.)
