# MARCH

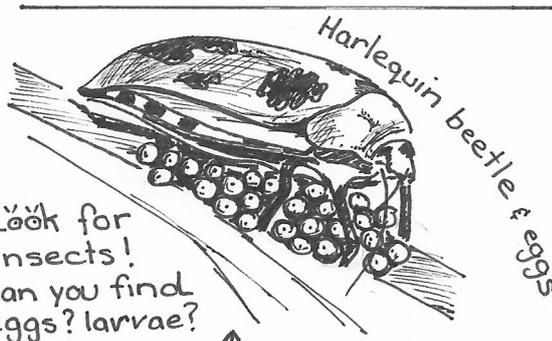

Leaf-curling Spider  
~Phonognatha graeffei~

Copy

"Our footsteps crunch and crackle on tinder-dry leaves and crisp lichens. We scuff along dusty paths smudged with yesterday's foot-prints. The bush is silent, eerily devoid of life, sulky in the long dry heat." Bush seasons ~ Joan Semmens

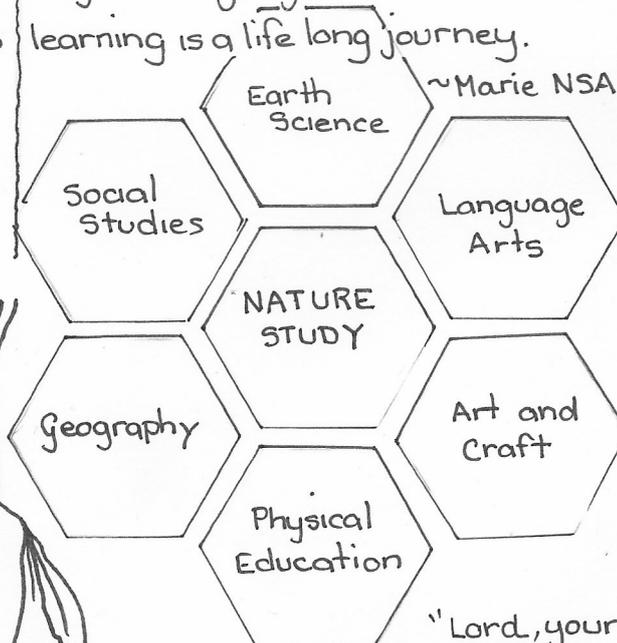

## Look For, Write About ...

- flowering Tea-tree
- blackberries
- black field crickets
- harlequin bugs
- Orb weavers
- leaf-curling spiders
- Kangaroo apple fruit
- ruby salt bush fruit
- honeyeaters in red gums
- pied currawongs
- aquatic insects emerging
- baby pipe-fish
- spring tail insects on ponds
- Cana lilies flowering
- deciduous trees begin to change colour
- platypus

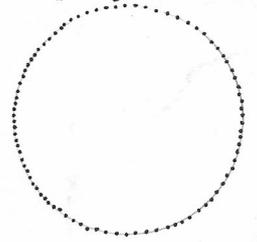

Look for insects!  
Can you find eggs? larvae? pupa?

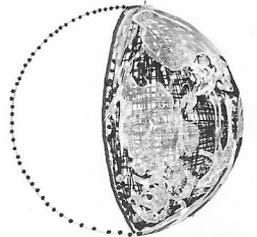

The curriculum web based on nature study as a central topic enables us to understand that all subjects, and life itself, are interconnected. When we understand this, it takes the pressure off to tick all those boxes and finish all the pages in the science, math and English language books. We realise learning is a life long journey.

## MOON PHASES

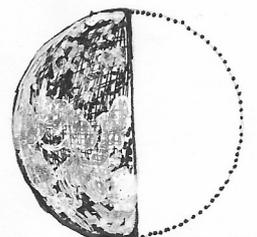

New Moon  
March 3rd

First Quarter  
March 10th

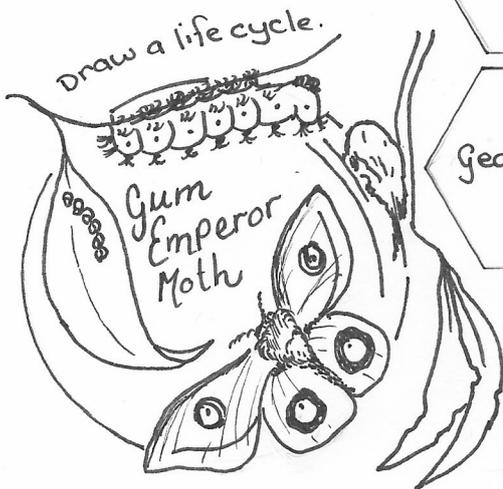

Full Moon  
March 18th

Last Quarter  
March 25th

## Autumnal Equinox March 21, 2022

Psalms 36:5-6

"Lord, your faithful love reaches to heaven, your faithfulness to the clouds. Your righteousness is like the highest mountains, your judgements like the deepest sea. Lord, you preserve people and animals."
